SUMMARY

Junior engineer in post-sales team with 1.5+ years of experience in database operations, supporting clients in their implementation, troubleshooting, root cause analysis, system validation, and database migration. Recently contributed to a Kafka implementation project and worked in close coordination with the stakeholders and implementation partner to ensure a smooth implementation.

EXPERIENCE

Junior Engineer, Post-sales (Oracle)

Express Systems Limited

August 2024 – Present

- Installation, configuration and migration of Oracle Database 11g, 12c, 19c.
- Installation and configuration of Oracle Data Guard and RAC.
- Perform logical database backup and restore using EXPDP/IMPDP and Rman.
- Monitored database health and performance metrics, identifying and troubleshooting issues to sustain optimal system reliability and minimize service disruptions.

PROJECTS

Kafka Implementations – Client: Grameenphone

- Coordinated with international implementation partners and client stakeholders to align requirements, resolve blockers, and ensure smooth cross-functional execution.
- Acted as the primary coordination point between the client and implementation teams, facilitating clear communication of requirements, project updates, and issue resolutions.
- Organized stakeholder workshops and solution discussions to align project scope, use cases, and business objectives.
- Managed task trackers, action plans, timelines, and regular status reporting to monitor progress, highlight risks, and maintain stakeholder alignment.
- Prepared and maintained project documentation including MoMs, action trackers, implementation updates, and system readiness reports.
- Supported pre-implementation activities through environment validation, access coordination, server requirement verification, and deployment readiness checks.

- Collaborated across teams to proactively identify and resolve implementation and operational challenges during project execution.

Education

B.Sc. in C.S.E

Ahsanullah University of Science and Technology • 2024 • 3.26 out of 4.00

- Thesis on "Integration of Machine Learning Algorithms for Precision Crop Recommendations".
- Paper titled "Enhancing Construction Site Safety: A Deep Learning Approach for Detection and Monitoring of Safety Equipment" published in ICCIT.

H.S.C

Birshreshtha Noor Mohammad Public College • 2019 • 5.00 out of 5.00

S.S.C

Mohammadpur Preparatory School • 2017 • 5.00 out of 5.00

SKILLS

Analytical & Business Skills

- Requirement Analysis & Workflow Design
- Structured Documentation (MoM, Action Trackers, Process Flows)
- Process Improvement, Issue Resolution, Stakeholder Communication & Coordination
- Task Tracking & SLA Management
- Reporting & Data Analysis
- Stakeholder Management (Global or Remote Coordination)

Technical Skills

- Databases: Oracle, MySQL
- SQL: Joins, Aggregations, Data Extraction
- Operating Systems: Red Hat Linux, Oracle Linux
- Jira, Power BI
- Platforms: Oracle WebLogic, Oracle OEM

Conceptual Knowledge

- Agile & Scrum Fundamentals
- User Stories & Acceptance Criteria
- Cloud Architecture Concepts & Cloud Basics (AWS, IaaS/PaaS/SaaS)
- SDLC and STLC
